-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 06 October 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 16-19 and 24-27 in the reply filed on 10/06/05 is acknowledged.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 16-19 and 24-27** are rejected under 35 U.S.C. 102(b) as being anticipated by Kimura 5,716,264.

Referring to claims 16-19, Kimura discloses a method of polishing a workpiece, the method comprising: polishing a workpiece by bringing the workpiece into contact with a polishing surface, and dressing the polishing surface after the polishing by ejecting fluid jets from a radially inward position at a first speed or pressure and from a radially outward position at a second speed or pressure which is higher than the first speed or pressure; conditioning the polishing surface by a contact-type dresser for initial conditioning before starting using the polishing surface; dressing the polishing surface after the polishing by the contact-type dresser simultaneously with the dressing of the polishing surface after the polishing by ejecting fluid jets; and the contact-type dresser comprises a diamond dresser.

Art Unit: 3723

Referring to claims 24-27, Kimura discloses a method of polishing a workpiece, the method comprising: polishing a workpiece by bringing the workpiece into contact with a polishing surface; and dressing the polishing surface after the polishing by ejecting fluid jets from a plurality of jet nozzles, wherein a number of the plurality of jet nozzles at a radially inward position is less than a number of the plurality of jet nozzles at a radially outward position; conditioning the polishing surface by a contact-type dresser for initial conditioning before starting using the polishing surface; dressing the polishing surface after the polishing by the contact-type dresser simultaneously with said dressing of the polishing surface after said polishing by ejecting fluid jets; and the contact-type dresser comprises a diamond dresser (column 5, line 22 - column 6, line 67).

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 16-19 and 24-27 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-5 of U.S. Patent No. 6,645,053. Although the conflicting claims are not identical, they are not patentably distinct from each other because the subject matter of the application claims is anticipated by the patented claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alvin J. Grant whose telephone number is (571) 272-4484. The examiner can normally be reached on Mon-Fri 8:00-4:30.
